Its content (text, photos, videos) does not reflect the official opinion of the Programme Operator, the National Contact Point and the Financial Mechanism Office. Responsibility for the information and views expressed therein lies entirely with the author(s)

Scientific background and experience used to define the main aims and expected outcomes of the EMERALD project

Providing **teaching resources and methods for professors** coming from the Higher Education institutions that are interested to find ways in providing their **students** relevant knowledge, skills and competences in conceiving, developing and realizing of different biomimetic mechatronic systems by 3D printing methods for people with special needs (amputated arms), such as:

- EMERALD **support e-courses** related to the objective (based on one curriculum defined by the EMERALD consortium)
- EMERALD **e-toolkit manual** for digital learning (correlated with the support courses)
- EMERALD **e-learning virtual laboratory** platform for developing, producing and testing of biomimetic mechatronic systems made by 3D printing (in correlation with the support e-courses and the e-toolkit manual)
- EMERALD **e-case studies** for project based learning method used in developing, testing and manufacturing of new types of biomimetic mechatronic systems made by 3D printing technologies for people with special needs (amputated arms)

The advantages of the EMERALD methods will be that the **professors and students will gain knowledge and competences related to the developing, designing, producing of biomimetic mechatronic systems made by 3D printing methods and testing of developed systems that are aimed to support people with special needs (amputated arms) in the end.**

This results was realised with the EEA Financial Mechanism 2014-2021 financial support. EUROPEAN NETWORK FOR 3D PRINTING OF BIOMIMETIC MECHATRONIC SYSTEMS - EMERALD

Background of the EMERALD project
interdisciplinary domains / interconnections with previous EEA grants

ARMIN ARM NEUROPROSTHESIS EQUIPED WITH ARTIFICIAL SKIN AND SENSC

ARM NEUROPROSTHESIS EQUIPED WITH ARTIFICIAL SKIN AND SENSORIAL FEEDBACK - ARMIN

Partners: UPB, National Institute of Microtechnolgy, Clinical Hospital of Floreasca, Medical Science Academy, Areus Technology, University of South-Eastern Norway, budget approx. 1.510.000 euro

The main objective of the project *was to design and fabricate the command and control system of a neuroprosthesis that integrates the motion algorithms with the command and sensory signals. The sensorial feedback system is re-establishing the sensorial function of amputated arms and is able to achieve high precision movements when handling objects with the neuroprosthesis. To design and fabricate a set of regenerative neural bio-interfaces for selecting and stimulating (from ulnar and median nerves), the sensory axons considered being in charge with the transmission of tactile sensations from palm and fingers, before amputation has been developed. These bio-interfaces allow the tactile signals from the fingers and palms of the neuroprosthesis to be transmitted through these sensory axons. In this way the patient actually feels tactile feedback sensations when handling objects with neuroprosthesis. To mount a fully functional neuroprosthesis on the patient stump, it was needed to connected to the peripheral nervous system of the patient.*
For delivering the arm neuroprosthesis prototype (implanted in the patient stump and WiFi connected to the prosthesis hand), most of lost arm and hand functions were achieved by 3D printing.

This results was realised with the EEA Financial Mechanism 2014-2021 financial support. Its content (text, photos, videos) does not reflect the official opinion of the Programme Operator, the National Contact Point and the Financial Mechanism Office. Case studies proposed to be realized in the EMERALD project

Universal prosthetic hand with mechanical fingers [PUT materials]

Corrective WHOs for patients with shoulder dystocia [PUT project report]

Orthyo sensors available at PUT [orthyo.com]

3D printed waterproof AFOs for patient with severe spina bifida

Therapy using VR applications (gamification)

This results was realised with the EEA Financial Mechanism 2014-2021 financial support. Its content (text, photos, videos) does not reflect the official opinion of the Programme Operator, the National Contact Point and the Financial Mechanism Office. Responsibility for the information and views expressed therein lies entirely with the author(s)

Target audience (groups) / relevant stakeholders to be involved in the project)

The EMERALD project proposal is addressing to the professors and students that are interested in gaining knowledge and competences related to the developing, designing, producing of biomimetic mechatronic systems made by 3D printing methods and testing of developed systems that are aimed to support people with special needs (with amputated arms). They are the main target audience / to whom the project is being addressing to.

People with special needs are beneficiaries (end users) of developed solutions in the EMERALD project.

This results was realised with the EEA Financial Mechanism 2014-2021 financial support. Its content (text, photos, videos) does not reflect the official opinion of the Programme Operator, the National Contact Point and the Financial Mechanism Office. Responsibility for the information and views expressed therein lies entirely with the author(s)

EUROPEAN NETWORK FOR 3D PRINTING OF BIOMIMETIC MECHATRONIC SYSTEMS - EMERALD

Target audience (groups) / relevant stakeholders to be involved in the project)

Conceiving of the European network for 3D printing of biomimetic mechatronic systems is one objective of the project. This will be done by finding the proper ways to involve the major stakeholders in the project (Public organizations, Health / Medical institutions, 3D printing companies, SMEs, clusters), etc through the activities organized in the project (multiplier events, summer school activities). Stakeholders are the key actors that might benefit of the project results.

Involving of local authorities

Attracting of most important companies and organizations that are acting in 3D printing / bio-mechatronics sector – EMERALD aim is to build an EUROPEAN Network also

TUCN – strategic partner within the European University of Technology EuT+ (https://www.univ-tech.eu/) and ERASMUS + programs

EUROPEAN NETWORK FOR 3D PRINTING OF BIOMIMETIC MECHATRONIC SYSTEMS - EMERALD

I01 - EMERALD e-book for developing of biomimetic mechatronic systems

Start Date : 15 Feb 2022 **End Date : 31 Jul 2022**

Responsible: Technical University of Cluj-Napoca

The main aim of the I01 is to provide the proposed **CURRICULUM** for increasing the application of research results in regenerative medicine, human-machine interfaces, advanced robotics, new paradigms in biomimetic mechatronic systems, etc. The curriculum comprise **8 MODULES.**

Open access on the platform?

Content?

Template?

Report?

MODULES	RESPONSIBLES
1. Computer Aided Design (CAD)	PUT
2. Computer Aided Engineering (CAE)	TUCN
3. Computer Programming	UiA
4. Virtual Reality / Augmented Reality	PUT & BIZZCOM
5. Sensors and Electronics	UPB
6. Bio-Mechatronics	UiA
7. 3D printing and Rapid Tooling methods	TUCN
8. Intelligent (smart) materials	UPB

Starting: **15.02.2022**

Deadline: **31.07.2022**

For each module according to the skills and competences of the EMERALD partners consortium, from the **Technical team there will be nominated 1-2 responsible persons** which will be in charge with one module and will need to provide course support for the particular module courses necessary for **producing biomechatronic / biomimetic systems**.

This results was realised with the EEA Financial Mechanism 2014-2021 financial support. Its content (text, photos, videos) does not reflect the official opinion of the Programme Operator, the National Contact Point and the Financial Mechanism Office. Main KPIs of the EMERALD project

I04 - EMERALD e-case studies for project based learning method used in developing, testing and manufacturing of new biomimetic mechatronic systems by 3D printing technologies

RESULTS (KPIs):

- ✓ 4 case study reports
- ✓ 1 open access book
- ✓ 1 open access toolkit manual
- ✓ 4 academic / scientific papers (ISI with Impact factor) are expected to be delivered at the end and shared via a-platform of EMERALD project as good practice use for dissemination
- ✓ e-learning platform conceived by the EMERALD consortium is intended to be used finally as one powerful tool for attracting the major stakeholders in he field of bio-mechatronics /30 printing domains) to scale up the solutions to build one active an representative network for 30 printing of biomimetic mechatronic systems in Europe (EMERALD network)

DISSEMINATION:

1. Chapters that might be used by students for BSc projects / reports that emphasize the case studies and use of EMERALD resources in developing, producing or testing new types of biomimetic mechatronic systems by 30 printing (reports will be shared via the e-learning platform of EMERALD project in open-access mode in order to emphasize how EMERALD resources were used in sorting out real issues in close correlation with the persons with special needs I adapted for these case studies);
2. Case studies developed, tested and made at this level will provide important feedbacks regarding the EMERALD resources and regarding the new biomimetic mechatronic systems developed for people with special needs.
3. Since topic of the EMERALD project and content is in the interest of SMEs and Medical Institutions, transfer of know-how from the universities engaged in the EMERALD consortium to stakeholders, as well as building strategic partnerships and applying for new EU projects is highly foreseen to be reached at dissemination level in the future as well.
4. patenting process of the solutions developed by the EMERALD consortium (patent submitting application)
5. Advertising is not for dissemination, but is needed for promoting of the consortium and events (logo of the project, advertising, web page, newspapers) etc.

EUROPEAN NETWORK FOR 3D PRINTING OF BIOMIMETIC MECHATRONIC SYSTEMS - EMERALD

Iceland Liechtenstein Norway grants

EMERALD: European network for 3D printing of biomimetic mechatronic systems
EEA & Norway Grant - Contract No. 21-COP-0019

MULTIPLIER EVENT ON RESEARCH BASE LEARNING METHOD FOR TEACHING IN BIO-MECHATRONICS

POLITEHNICA University of Bucharest, Romania

Program

Date: 02.09.2022, between 9.00-14.00, UPB Central Library, Hall 2.2

Hour	Activity
9:00	Participants registration
9:15	Event opening Prof. Nicolae Ionescu (Politehnica University of Bucharest) / Prof. Tom Savu (Politehnica University of Bucharest) – Dep TCM
9:30	EMERALD Project Presentation Assoc. Prof. Diana Băilă (Politehnica University of Bucharest)
9:45	ANPCDEFP – Radu Stoika – EEA Norway grants – aims, particularities and opportunities
10:00	EMERALD Project – Main Aims, Actions and Activities of the project Assoc.Prof. Răzvan Păcurar (Technical University of Cluj-Napoca, Romania)
10:15	University of Agder Norway – Presentation Prof. Filippo Sanfilippo
10:30	Poznan University of Technology – Presentation Prof. Filip Gorski
10:45	LEYCOM Company – Presentation (Additive manufacturing of prostheses: SLM, SLA, SLS, FRESH 3D Printing, etc)
11:00	Coffee Break
11:15	Intelligent (Smart) Materials Prof. Zaharia Cătălin (Politehnica University of Bucharest)
11:45	ADMASYS Company – Presentation NUTECHNOLOGIES Company – Presentation
12:15	BIZZCOM Company - Slovakia Director Eng. Branislav Rabara
12:30	« Ilie Murgulescu » Institute of Physical – Chemistry – Romanian Academy - Bucharest Oxide nanomaterials used for sensors CS3 Eng. Oana Cătălina Mocioiu
13:00	Round table discussions about future potential collaboration in the bio-mechatronics / 3D printing domain - Assoc. Prof. Diana Băilă (Politehnica University of Bucharest)
13:30	Final conclusions
14:00	Lunch time

Multiplier event – UPB – 02 September 2022

EMERALD project consortium partners:

This results was realised with the EEA Financial Mechanism 2014-2021 financial support. Its content (text, photos, videos) does not reflect the official opinion of the Programme Operator, the National Contact Point and the Financial Mechanism Office. Multiplier event – University Politehnica Bucharest – 02 September 2022

This results was realised with the EEA Financial Mechanism 2014-2021 financial support. Its content (text, photos, videos) does not reflect the official opinion of the Programme Operator, the National Contact Point and the Financial Mechanism Office. Responsibility for the information and views expressed therein lies entirely with the author(s)

Multiplier event – University Politehnica of Bucharest, Romania – 2nd of September 2022

EMERALD Multiplier Event – UPB – plenary presentations

This results was realised with the EEA Financial Mechanism 2014-2021 financial support. Its content (text, photos, videos) does not reflect the official opinion of the Programme Operator, the National Contact Point and the Financial Mechanism Office. Responsibility for the information and views expressed therein lies entirely with the author(s)

Multiplier event – University Politehnica Bucharest – 02 September 2022

EMERALD Multiplier Event - visiting the Bio-technology laboratory - Department of Bioresources and Polymer Science of UPB

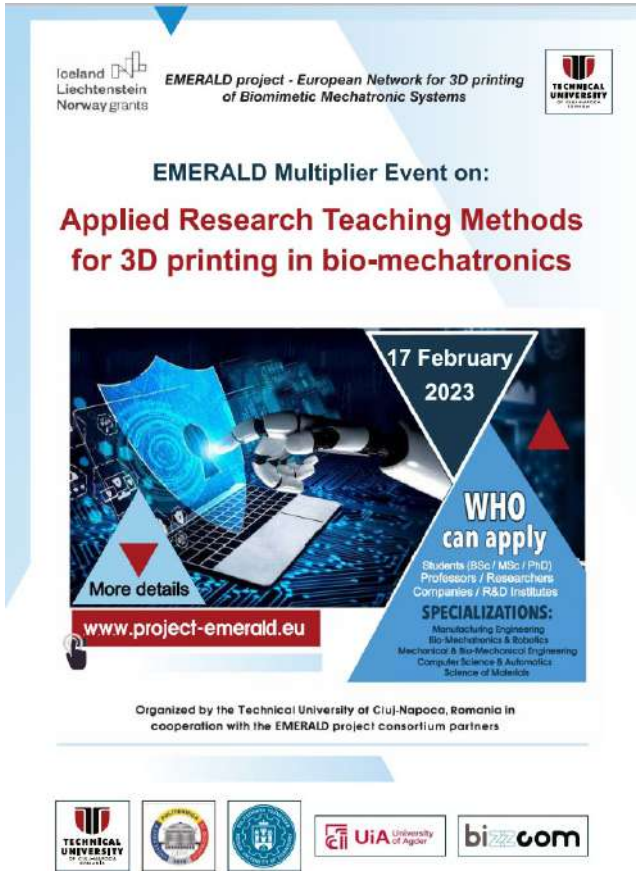
This results was realised with the EEA Financial Mechanism 2014-2021 financial support. Its content (text, photos, videos) does not reflect the official opinion of the Programme Operator, the National Contact Point and the Financial Mechanism Office. Responsibility for the information and views expressed therein lies entirely with the author(s)

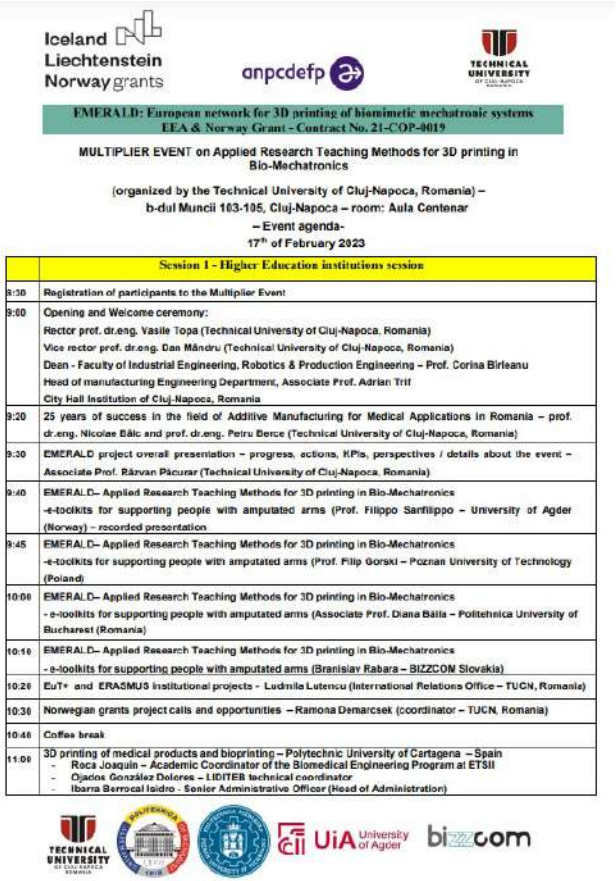
Multiplier event – University Politehnica Bucharest – 02 September 2022

EMERALD Multiplier Event – 3D printing live demonstrations made by the companies / 3D printed parts for the EMERALD consortium partners' realized by the companies

This results was realised with the EEA Financial Mechanism 2014-2021 financial support. Its content (text, photos, videos) does not reflect the official opinion of the Programme Operator, the National Contact Point and the Financial Mechanism Office. Responsibility for the information and views expressed therein lies entirely with the author(s)

EUROPEAN NETWORK FOR 3D PRINTING OF BIOMIMETIC MECHATRONIC SYSTEMS - EMERALD





EMERALD: European network for 3D printing of biomimetic mechatronic systems
EEA & Norway Grant - Contract No. 21-COP-0019

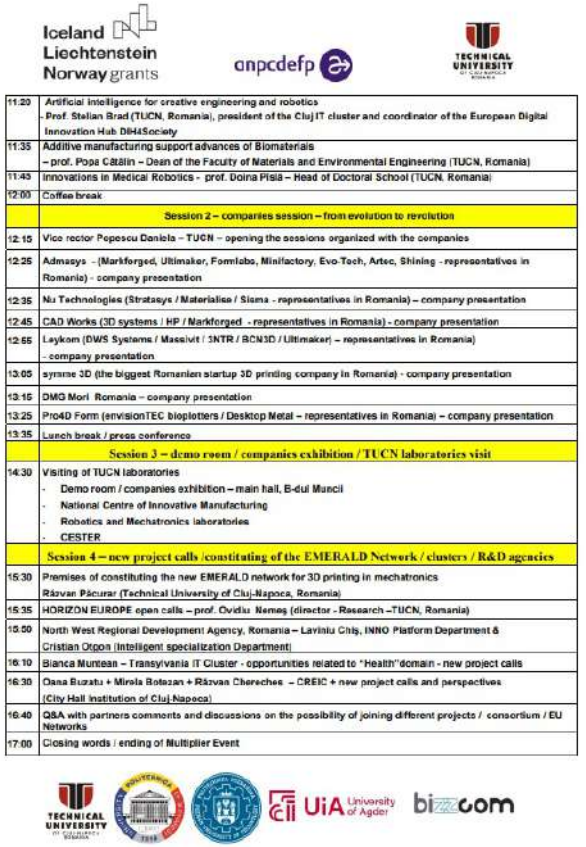
MULTIPLIER EVENT on Applied Research Teaching Methods for 3D printing in Bio-Mechatronics

(organized by the Technical University of Cluj-Napoca, Romania) – b-dul Muncii 103-105, Cluj-Napoca – room: Aula Centenar

– Event agenda-

17th of February 2023

	Session 1 - Higher Education institutions session
8:30	Registration of participants to the Multiplier Event
9:00	Opening and Welcome ceremony: Rector prof. dr.eng. Vasile Topa (Technical University of Cluj-Napoca, Romania) Vice rector prof. dr.eng. Dan Mândru (Technical University of Cluj-Napoca, Romania) Dean - Faculty of Industrial Engineering, Robotics & Production Engineering – Prof. Corina Birleanu Head of manufacturing Engineering Department, Associate Prof. Adrian Trif City Hall Institution of Cluj-Napoca, Romania
9:20	25 years of success in the field of Additive Manufacturing for Medical Applications in Romania – prof. dr.eng. Nicolae Bâlc and prof. dr.eng. Petru Berce (Technical University of Cluj-Napoca, Romania)
9:30	EMERALD project overall presentation – progress, actions, KPIs, perspectives / details about the event – Associate Prof. Răzvan Păcurar (Technical University of Cluj-Napoca, Romania)
9:40	EMERALD– Applied Research Teaching Methods for 3D printing in Bio-Mechatronics -e-toolkits for supporting people with amputated arms (Prof. Filippo Santfilippo – University of Agder (Norway) – recorded presentation
9:45	EMERALD– Applied Research Teaching Methods for 3D printing in Bio-Mechatronics -e-toolkits for supporting people with amputated arms (Prof. Filip Gorski – Poznan University of Technology (Poland)
10:00	EMERALD– Applied Research Teaching Methods for 3D printing in Bio-Mechatronics - e-toolkits for supporting people with amputated arms (Associate Prof. Diana Băila – Politehnica University of Bucharest (Romania)
10:10	EMERALD– Applied Research Teaching Methods for 3D printing in Bio-Mechatronics - e-toolkits for supporting people with amputated arms (Branislav Rabara – BIZZCON Slovakia)
10:20	EuT+ and ERASMUS institutional projects - Ludmila Lutencu (International Relations Office – TUCN, Romania)
10:30	Norwegian grants project calls and opportunities – Ramona Demarcsek (coordinator – TUCN, Romania)
10:40	Coffee break
11:00	3D printing of medical products and bioprinting – Polytechnic University of Cartagena – Spain - Roca Joaquin – Academic Coordinator of the Biomedical Engineering Program at ETSII - Ojados González Dolores – LIDITEB technical coordinator - Ibarra Berrocal Isidro - Senior Administrative Officer (Head of Administration)



11:20	Artificial intelligence for creative engineering and robotics - Prof. Stelian Brad (TUCN, Romania), president of the ClujIT cluster and coordinator of the European Digital Innovation Hub DIH4Society
11:35	Additive manufacturing support advances of Biomaterials – prof. Popa Cătălin – Dean of the Faculty of Materials and Environmental Engineering (TUCN, Romania)
11:45	Innovations in Medical Robotics - prof. Doina Pîslă – Head of Doctoral School (TUCN, Romania)
12:00	Coffee break
	Session 2 – companies session – from evolution to revolution
12:15	Vice rector Pepescu Daniela – TUCN – opening the sessions organized with the companies
12:25	Admaxys - (Markforged, Ultimaker, Formlabs, Minifactory, Evo-Tech, Artec, Shining - representatives in Romania) - company presentation
12:35	Nu Technologies (Stratasys / Materialise / Sisma - representatives in Romania) – company presentation
12:45	CAD Works (3D systems / HP / Markforged - representatives in Romania) - company presentation
12:55	Laykom (DWS Systems / Massivit / 3NTR / BCN3D / Ultimaker) – representatives in Romania) - company presentation
13:05	syrame 3D (the biggest Romanian startup 3D printing company in Romania) - company presentation
13:15	DMG Mori Romania – company presentation
13:25	Pro4D Form (envisionTEC bioplotters / Desktop Metal – representatives in Romania) – company presentation
13:35	Lunch break / press conference
	Session 3 – demo room / companies exhibition / TUCN laboratories visit
14:30	Visiting of TUCN laboratories - Demo room / companies exhibition – main hall, B-dul Muncii - National Centre of Innovative Manufacturing - Robotics and Mechatronics laboratories - CESTER
	Session 4 – new project calls /constituting of the EMERALD Network / clusters / R&D agencies
15:30	Premises of constituting the new EMERALD network for 3D printing in mechatronics Răzvan Păcurar (Technical University of Cluj-Napoca, Romania)
15:35	HORIZON EUROPE open calls – prof. Ovidiu Nemeș (director - Research –TUCN, Romania)
15:50	North West Regional Development Agency, Romania – Lavinia Chiș, INNO Platform Department & Cristian Otpon (Intelligent specialization Department)
16:10	Bianca Muntean – Transylvania IT Cluster - opportunities related to "Health"domain - new project calls
16:30	Oana Buzatu + Mirela Botezan + Răzvan Chereches – CREIC + new project calls and perspectives (City Hall institution of Cluj-Napoca)
16:40	Q&A with partners comments and discussions on the possibility of joining different projects / consortium / EU Networks
17:00	Closing words / ending of Multiplier Event

UNIVERSITATEA TEHNICĂ DIN CLUJ-NAPOCA

MEMBRĂ A EUT+ EUROPEAN UNIVERSITY OF TECHNOLOGY

Multiplier event – TUCN – 17th of February 2023

This results was realised with the EEA Financial Mechanism 2014-2021 financial support. Its content (text, photos, videos) does not reflect the official opinion of the Programme Operator, the National Contact Point and the Financial Mechanism Office. Responsibility for the information and views expressed therein lies entirely with the author(s)

Multiplier event – TUCN – 17 February 2022

This results was realised with the EEA Financial Mechanism 2014-2021 financial support. Its content (text, photos, videos) does not reflect the official opinion of the Programme Operator, the National Contact Point and the Financial Mechanism Office. Responsibility for the information and views expressed therein lies entirely with the author(s)

Multiplier event – Technical University of Cluj-Napoca – 17 February 2023

EMERALD Multiplier Event – Applied Research Methods for 3D Printing in Bio-Mechatronics

This results was realised with the EEA Financial Mechanism 2014-2021 financial support. Its content (text, photos, videos) does not reflect the official opinion of the Programme Operator, the National Contact Point and the Financial Mechanism Office. Responsibility for the information and views expressed therein lies entirely with the author(s)

Multiplier event – Technical University of Cluj-Napoca – 17 February 2023

EMERALD Multiplier Event – presentation made by University of Agder (Norway) partner about results reached in the frame of IO2

This results was realised with the EEA Financial Mechanism 2014-2021 financial support. Its content (text, photos, videos) does not reflect the official opinion of the Programme Operator, the National Contact Point and the Financial Mechanism Office. Responsibility for the information and views expressed therein lies entirely with the author(s)

Multiplier event – Technical University of Cluj-Napoca – 17 February 2023

EMERALD Multiplier Event – presentation made by Poznan University of Technology (Poland) partner about results reached in the frame of IO2

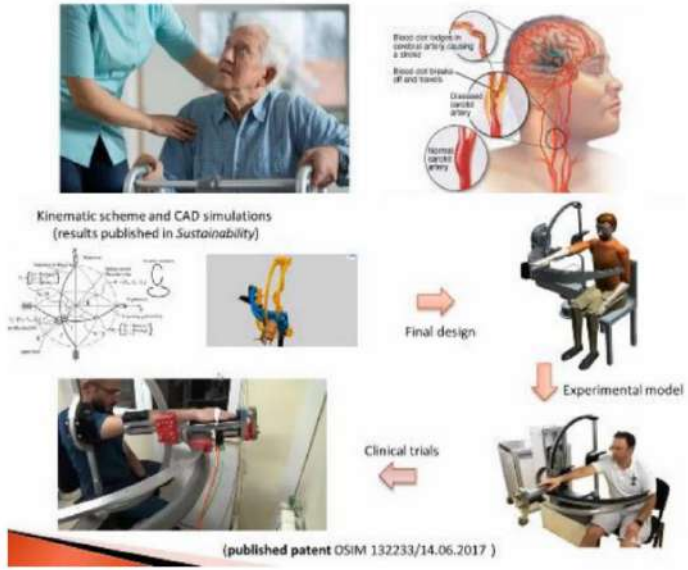
This results was realised with the EEA Financial Mechanism 2014-2021 financial support. Its content (text, photos, videos) does not reflect the official opinion of the Programme Operator, the National Contact Point and the Financial Mechanism Office. Responsibility for the information and views expressed therein lies entirely with the author(s)

Multiplier event – Technical University of Cluj-Napoca – 17 February 2023

EMERALD Multiplier Event – presentation made by University Politehnica Bucharest (UPB) and Bizzcom (Slovakia) partners about results reached in the frame of IO2

This results was realised with the EEA Financial Mechanism 2014-2021 financial support. Its content (text, photos, videos) does not reflect the official opinion of the Programme Operator, the National Contact Point and the Financial Mechanism Office. Responsibility for the information and views expressed therein lies entirely with the author(s)

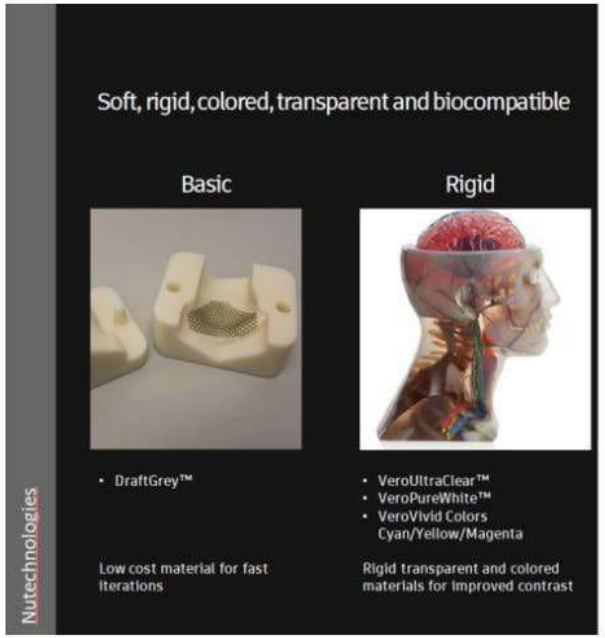
Multiplier event – Technical University of Cluj-Napoca – 17 February 2023



EMERALD Multiplier Event – presentations made by colleagues of TUCN in fields related to bio-mechatronics / robotics

This results was realised with the EEA Financial Mechanism 2014-2021 financial support. Its content (text, photos, videos) does not reflect the official opinion of the Programme Operator, the National Contact Point and the Financial Mechanism Office. Responsibility for the information and views expressed therein lies entirely with the author(s)

Multiplier event – Technical University of Cluj-Napoca – 17 February 2023



EMERALD Multiplier Event – presentations made by companies that are activating in the field of 3D printing

This results was realised with the EEA Financial Mechanism 2014-2021 financial support. Its content (text, photos, videos) does not reflect the official opinion of the Programme Operator, the National Contact Point and the Financial Mechanism Office. LTT activities

C1 : Intensive Programmes for higher education students – 3D printing and bio-mechatronics

Duration : 10 day(s)

Country of Venue : Norway

Total number of Participants : 30

Date: September 2022

The 1st International summer school organized by the University of Agder

Participating Organizations : University Politehnica Bucharest, Technical University of Cluj-Napoca, University of Agder, Bizzcom s.r.o., Poznan University of Technology

The target groups: **professors** (from EMERALD consortium and engaged in technical activities) & **students**
Organized free of charge ! the participants are required to **REGISTER** in the preamble.

Aims: Starting from the curriculum that has been defined by the EMERALD project consortium and taking into consideration that at the time of organizing this event, e-support courses are being delivered, EMERALD consortium professors will be able to exercise the usefulness of the information provided in the e-courses on the 1st edition of EMERALD International summer school, by being engaged in teaching activities and sharing the information prepared in the e-course modules (e-boock) IO1 with the attending professors & students.

Courses & practical activities related to the IO1 modules
Computer Aided Design,
Computer Aided Engineering,
Computer Programming,
Virtual Reality / Augmented Reality,
Sensors and Electronics,
BioMechatronics,
3D printing and Rapid Tooling methods,
Intelligent materials

Students will be organized in teams and competitions will be launched in order to finally produce the case studies that are being required to be made for the final test (case studies will be the ones stated to be realized in the O2, adapted for people with special needs).
At the end of the EMERALD International summer school, all participants will receive an invitation of joining the future activities of EMERALD consortium activities together with their professors (mentors) in the next upcoming year.

Content? Report? Certificates ?

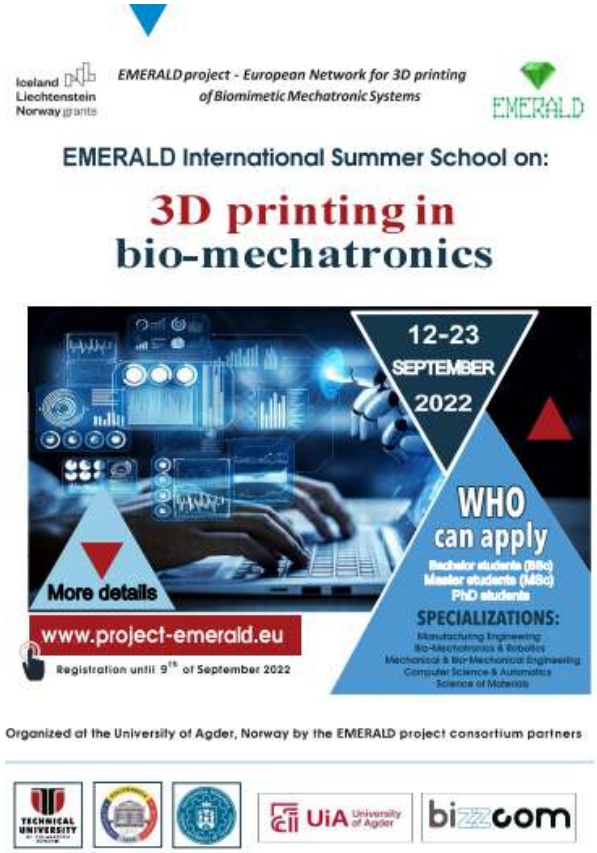
EUROPEAN NETWORK FOR 3D PRINTING OF BIOMIMETIC MECHATRONIC SYSTEMS - EMERALD



1st edition of the EMERALD International Summer School University of Agder (Grimstad, Norway)– 12-23 September 2022

EMERALD International Summer School on 3D Printing in Bio-Mechatronics – 12-23 September 2022

h	Monday 12.09.2022	Tuesday 13.09.2022	Wednesday 14.09.2022	Thursday 15.09.2022	Friday 16.09.2022	Monday 19.09.2022	Tuesday 20.09.2022	Wednesday 21.09.2022	Thursday 22.09.2022	Friday 23.09.2022	h
10	Opening ceremony and project presentation	CAD - Lecture	CAE - Lecture	Workshop 3D Printing and & Progress report, feedbacks regarding printing process, corrections to be made	Company visit, professional visit of SME company in Kristiansand / Stavanger + visiting of the fiords / socializing activity	General progress of W1 and objectives of W2	Intelligent (smart) materials	Computer Programming case studies	Finalizing progress report, preparing final presentation	Closing and awarding ceremony, future perspectives of the EMERALD project	10
11	Participants' presentation and program guidelines for summer school	Workshop 3D / Launching of case studies	Workshop 3D CAE & Progress report	Medical and mechanical tests, metrology of mechatronic systems		Students' presentation (interim report + scientific presentations)	Sensors and electronics	VR and AR programming applications presentation, case studies	Final test, final questionnaires and feedbacks	EMERALD final consortium meeting	11
12	Lunch & free time	Lunch & free time	Lunch & free time	Lunch & free time		Feedback on behalf of the EMERALD experts and guidelines for W2	Lunch & free time	Lunch & free time	Lunch & free time	Lunch & free time	12
13	Visiting of UiA laboratories and city tour of Kristiansand city	Workshop 3D CAD redesigned & Progress report	3D printing and Rapid Tooling for mechatronics	Laboratory on Mechanical test, metrology/ medical institute visit		Bio-mechatronics	Assembling and testing of mechatronic systems conceived and developed	Developing of VR /AR applications	Round table with local representatives of business sector (companies / research institutes) involved in mechatronics)	Free time, sightseeing	13
14			Workshop 3D Printing and & Progress report	Re-designing / re-analyzing / re-3D printing of the components		Laboratory on / bio-mechatronics			Final student presentations		14
15											15
	WEEK 1					WEEK 2

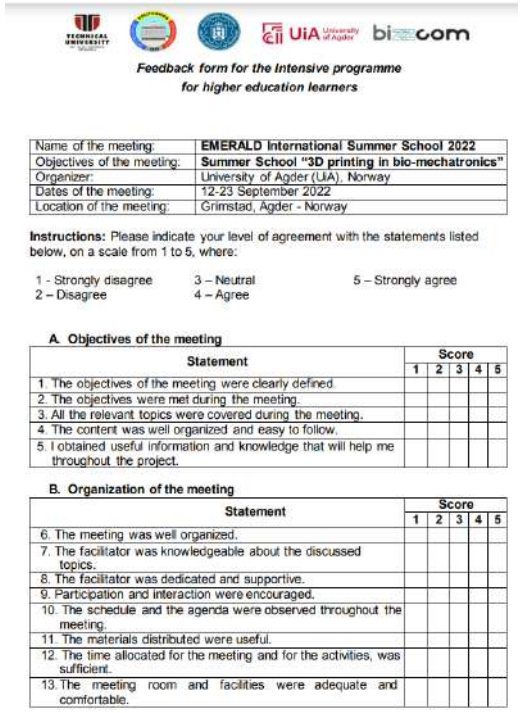
EUROPEAN NETWORK FOR 3D PRINTING OF BIOMIMETIC MECHATRONIC SYSTEMS - EMERALD

1st edition - EMERALD International Summer School - UiA (Norway)– 12-23 September 2022



Feedback form for the intensive programme for higher education learners

Name of the meeting:	**EMERALD International Summer School 2022**
Objectives of the meeting:	**Summer School "3D printing in bio-mechatronics"**
Organizer:	University of Agder (UiA), Norway
Dates of the meeting:	12-23 September 2022
Location of the meeting:	Grimstad, Agder - Norway

Instructions: Please indicate your level of agreement with the statements listed below, on a scale from 1 to 5, where:

1 - Strongly disagree
2 – Disagree
3 – Neutral
4 – Agree
5 – Strongly agree

A. Objectives of the meeting

Statement	Score 1	2	3	4	5
1. The objectives of the meeting were clearly defined.					
2. The objectives were met during the meeting.					
3. All the relevant topics were covered during the meeting.					
4. The content was well organized and easy to follow.					
5. I obtained useful information and knowledge that will help me throughout the project.					

B. Organization of the meeting

Statement	Score 1	2	3	4	5
6. The meeting was well organized.					
7. The facilitator was knowledgeable about the discussed topics.					
8. The facilitator was dedicated and supportive.					
9. Participation and interaction were encouraged.					
10. The schedule and the agenda were observed throughout the meeting.					
11. The materials distributed were useful.					
12. The time allocated for the meeting and for the activities, was sufficient.					
13. The meeting room and facilities were adequate and comfortable.

UiA University of Agder

CERTIFICATE OF ATTENDANCE

This is to certify that

Name and Surname

has attended the EMERALD International Summer School on:

3D Printing in Bio-Mechatronics

from 12.09.2022 to 23.09.2022

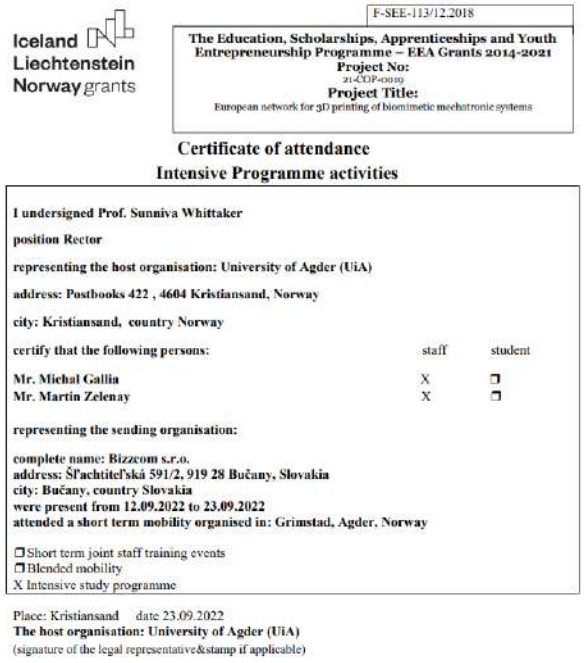
Organized at the University of Aader, Norway by the EMERALD Project consortium partners

Prof.Dr.Ene. Filippo Sanfilippo,
Partner of EMERALD project

In cooperation with

bizzcom

EMERALD International Summer School on 3D Printing in Bio-Mechatronics is organized at the University of Agder, Norway by the EMERALD Project consortium partners



Iceland Liechtenstein Norway grants

F-SEE-113/12.2018

The Education, Scholarships, Apprenticeships and Youth Entrepreneurship Programme – EEA Grants 2014-2021
Project No: 21-COP-0030
Project Title:
European network for 3D printing of biomimetic mechatronic systems

Certificate of attendance
Intensive Programme activities

I undersigned Prof. Sunniva Whittaker

position Rector

representing the host organisation: University of Agder (UiA)

address: Postbooks 422 , 4604 Kristiansand, Norway

city: Kristiansand, country Norway

certify that the following persons:	staff	student
Mr. Michal Gallia	X	☐
Mr. Martin Zelenay	X	☐

representing the sending organisation:

complete name: Bizzcom s.r.o.
address: Šachtitel'ská 591/2, 919 28 Bučany, Slovakia
city: Bučany, country Slovakia
were present from 12.09.2022 to 23.09.2022
attended a short term mobility organised in: Grimstad, Agder, Norway

☐ Short term joint staff training events
☐ Blended mobility
X Intensive study programme

Place: Kristiansand date 23.09.2022
The host organisation: University of Agder (UiA)
(signature of the legal representative&stamp if applicable)

Feedback forms and certificates provided to the EMERALD International summer school participants

EUROPEAN NETWORK FOR 3D PRINTING OF BIOMIMETIC MECHATRONIC SYSTEMS - EMERALD

LTT activities

Bucany, Slovakia

1-6 May 2023

C2 : Short-term joint staff training events – 3D printing and bio-mechatronics

Duration : 4 day(s)

Country of Venue : Slovakia

Total number of Participants : 20

Date: May 2023

The International summer school organized by the BIZZCOM company

Participating Organizations : University Politehnica Bucharest, Technical University of Clui-Napoca, University of Aeder, Bizzcom s.r.o., Poznan University of Technology

Staff for training event

Activity : ➢ is focused on **the use and testing the functionality of e-virtual laboratory** (e-learning) platform developed by the EMERALD consortium for teaching activities related to the manufacturing of biomimetic mechatronic systems by 3D printing

VR EMERALD platform

The target groups: ➢ **professors** ➢ **other people / institutions (stakeholders)** involved in research activities related to the developing, manufacturing and testing of new biomimetic mechatronic systems made by 3D printing, for people with special needs

Testing the functionality of virtual laboratory platform developed within IO3 related to:
different scenarios in VR / AR / Mixed Reality applications for people with special needs

EUROPEAN NETWORK FOR 3D PRINTING OF BIOMIMETIC MECHATRONIC SYSTEMS - EMERALD

LTT activities

C3 : Intensive Programmes for higher education students - 3D printing and bio-mechatronics

Duration : 10 day(s) | **Country of Venue : Norway** | **Total number of Participants : 30**

Date: July 2023

The 2nd International summer school organized by the University of Agder

Participating Organizations : University Politehnica Bucharest, Technical University of Cluj-Napoca, University of Agder, Bizzcom s.r.o., Poznan University of Technology

The target groups: **professors** (from EMERALD consortium and engaged in technical activities) & **students**
Organized free of charge ! the participants are required to **REGISTER** in the preamble.

Aims: to familiarize the attendees with the personalized and project based teaching methods used in Higher education and the efficiency of these methods in using the EMERALD project resources, especially e-virtual laboratory (e-learning platform) AR / VR / mixed reality applications **for getting knowledge and practical skills** in **developing of new biomimetic mechatronic systems by 3D** printing technologies and specific applications related to the **programming of biomimetic mechatronic** systems AR / VR applications.

Students will be able first to understand the **basic principles** that are related to CAD/CAE, manufacturing, programming and testing of biomimetic systems using e-virtual laboratory (e-learning) platform.
Professors will present on a course the basics of **different case study** that is being prepared, with the particularities involved in the case when biomimetic mechatronic systems are required to be materialized for people with special needs, emphasizing the facilities of the virtual laboratory (e-learning platform / AR / VR applications).
In this way the easiness in using the a-learning platform of the EMERALD consortium will be checked based on the feedbacks provided by students.

Testing and experiencing the virtual laboratory platform developed within IO3 related to:
different scenarios in VR / AR / Mixed Reality applications for people with special needs

IMPORTANT FEEDBACKS | Certificates ? | Report?

Main results reached during the EMERALD summer school organized at the University of Agder in July 2023 will be presented in September 2023 at the Multiplier event organized in Slovakia by BIZZCOM

2nd edition of the EMERALD International Summer School
University of Agder (Grimstad, Norway) – 28 August - 4 September 2023

Feedback form for the evaluating of the EMERALD e-learning virtual laboratory platform

Name of the event:	EMERALD International Summer School 2023
Objectives of the questionnaire:	Virtual e-Learning (virtual laboratory) platform Feedback Questionnaire
Organizer:	University of Agder (UiA), Norway
Dates of the meeting:	31 August 2023
Location of the meeting:	Grimstad, Norway

Please take a few moments to answer the following questions regarding your experience with the EMERALD e-Learning (virtual laboratory) platform. Your feedback is invaluable and will help us improve the user experience. **Please mark with an "x" your answer below as it fits:**

1. **Structure & Logic of Steps:**
   - How would you rate the clarity and logic of the steps presented within the EMERALD e-Learning (virtual laboratory) platform?

Very Clear	Clear	Neutral	Unclear	Very Unclear

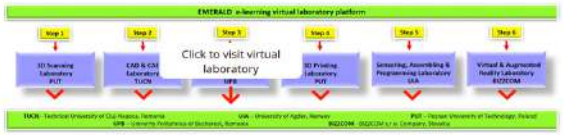
2. **Range and diversity of Applications:**
   - How satisfied are you with the range of applications (VR, AR, CAD models, etc.) presented within the EMERALD e-Learning (virtual laboratory) platform?

Very Satisfied	Satisfied	Neutral	Unsatisfied	Very Unsatisfied

3. **Innovative Learning Methods:**
   - How novel, innovative and practical do you find the learning methods presented within the EMERALD e-Learning (virtual laboratory) platform?

Very Modern	Moderately Modern	Neutral	Unsatisfied	Very Unsatisfied

6. **User Interface (EMERALD e-Learning (virtual laboratory) platform which is being accessed through the provided scheme on the EMERALD website):**
   - How would you rate the user-friendliness of the platform interface?



Very User-Friendly	User-Friendly	Neutral	Difficult to Use	Very Difficult to Use

7. **Videos & Presentations:**
   - How would you evaluate the quality and relevance of the videos and presentations provided within the EMERALD e-Learning (virtual laboratory) platform?

Excellent	Good	Neutral	Poor	Very Poor

8. **Lectures & Laboratories:**
   - Were the lectures and laboratories found within the EMERALD e-Learning (virtual laboratory) platform informative and beneficial to your learning experience?

Very Beneficial	Beneficial	Neutral	Slightly Beneficial	Not Beneficial

9. **Suggestions & Improvements:**
   - Are there any features or aspects of the EMERALD e-Learning (virtual laboratory) platform you believe could be improved or added? Please specify below.

Experiencing of the Virtual platform laboratory conceived by the EMERALD consortium in bio-mechatronics / 3D printing (with AR /VR facilities)

This results was realised with the EEA Financial Mechanism 2014-2021 financial support. Its content (text, photos, videos) does not reflect the official opinion of the Programme Operator, the National Contact Point and the Financial Mechanism Office. Responsibility for the information and views expressed therein lies entirely with the author(s)

2nd edition of the EMERALD International Summer School
University of Agder (Grimstad, Norway) – 28 August - 4 September 2023
